# The most technologically advanced safe

The Space Safe is a smart safe that connects with your cell phone to receive up-to-date notifications and alerts about your valuables.

2 Integrated  
HD Cameras

Enormous LCD  
Touch Display

Fingerprint  
Authentication

Tamper Sensors

WiFi

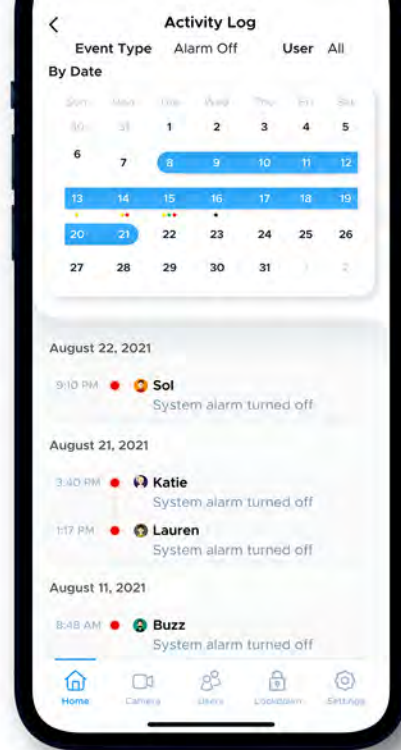

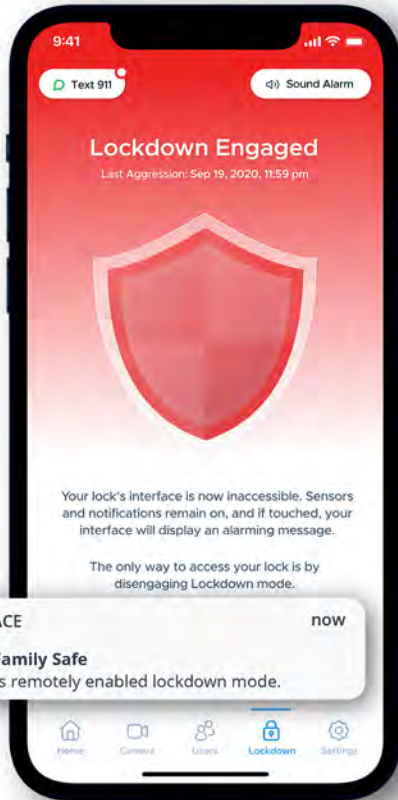

App Connectivity

Multiple User Entry

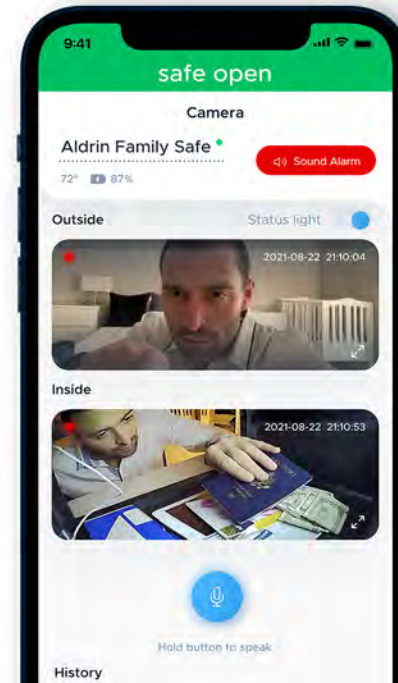

Temperature and  
Humidity Sensors

# Why is The Space Safe a smart safe?

Stay informed anywhere, anytime

With The Space App, receive notifications about your safe and valuables from anywhere in the world. Instantly view **camera feeds, safe activity logs, or lockdown** and call 911 all from your favorite restaurant or beach chair.

# The world's first safe with cameras

To monitor who accesses your safe outside, and what they touch inside

# Interior and Exterior Cameras

Be aware from anywhere

Own the **ONLY** safe to have any cameras and WiFi, so you are in total control from anywhere in the world.

With both exterior and interior cameras, **Camera Streaming** allows you to remotely view who is on the outside and what they're trying to take on the inside. Be there when it happens, as it happens.

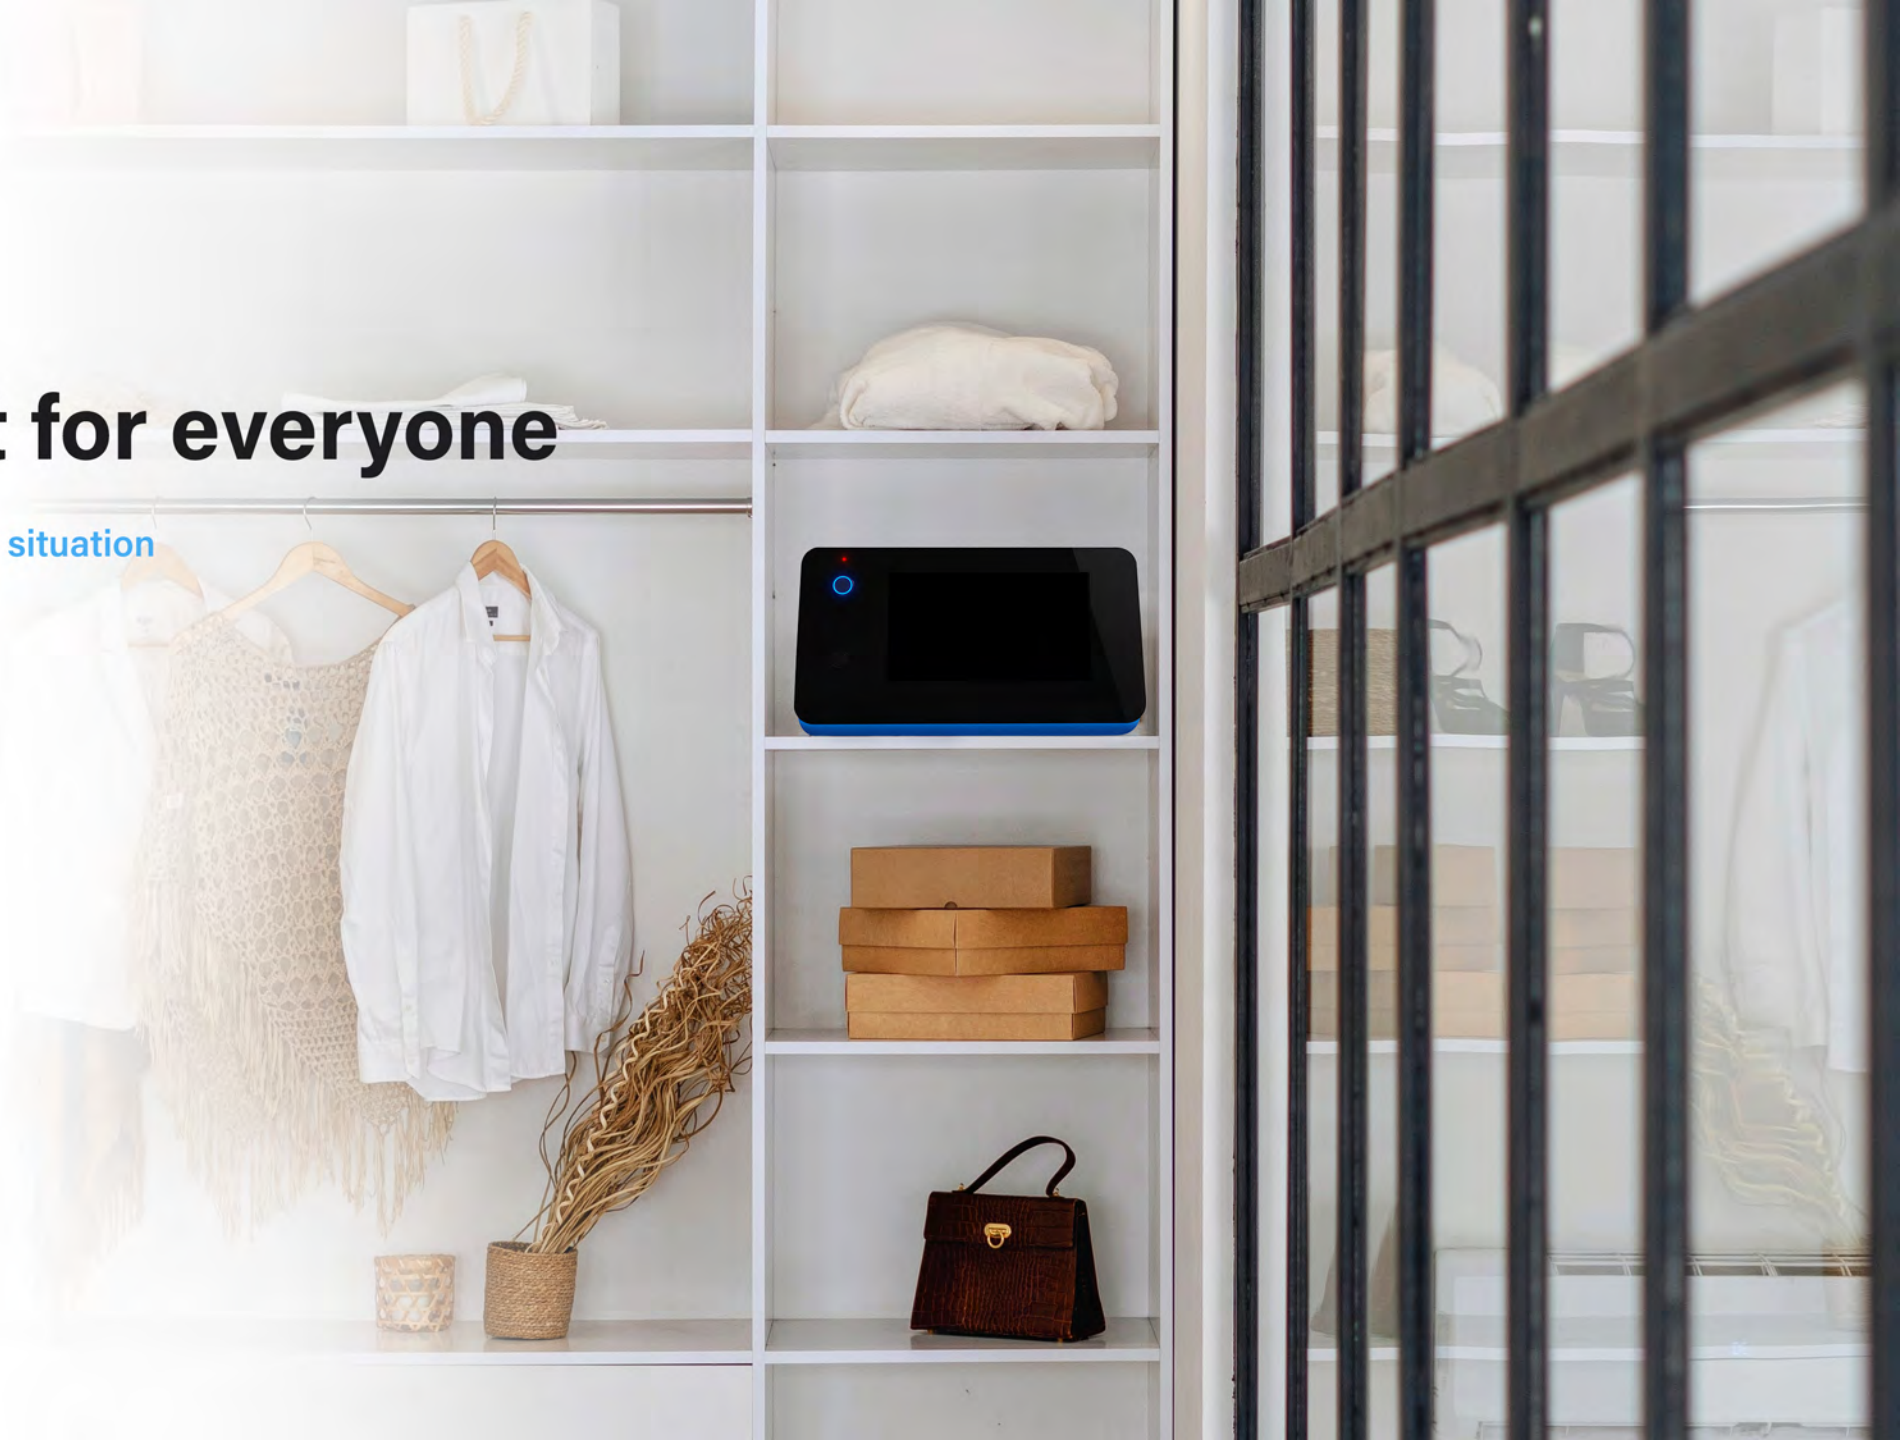

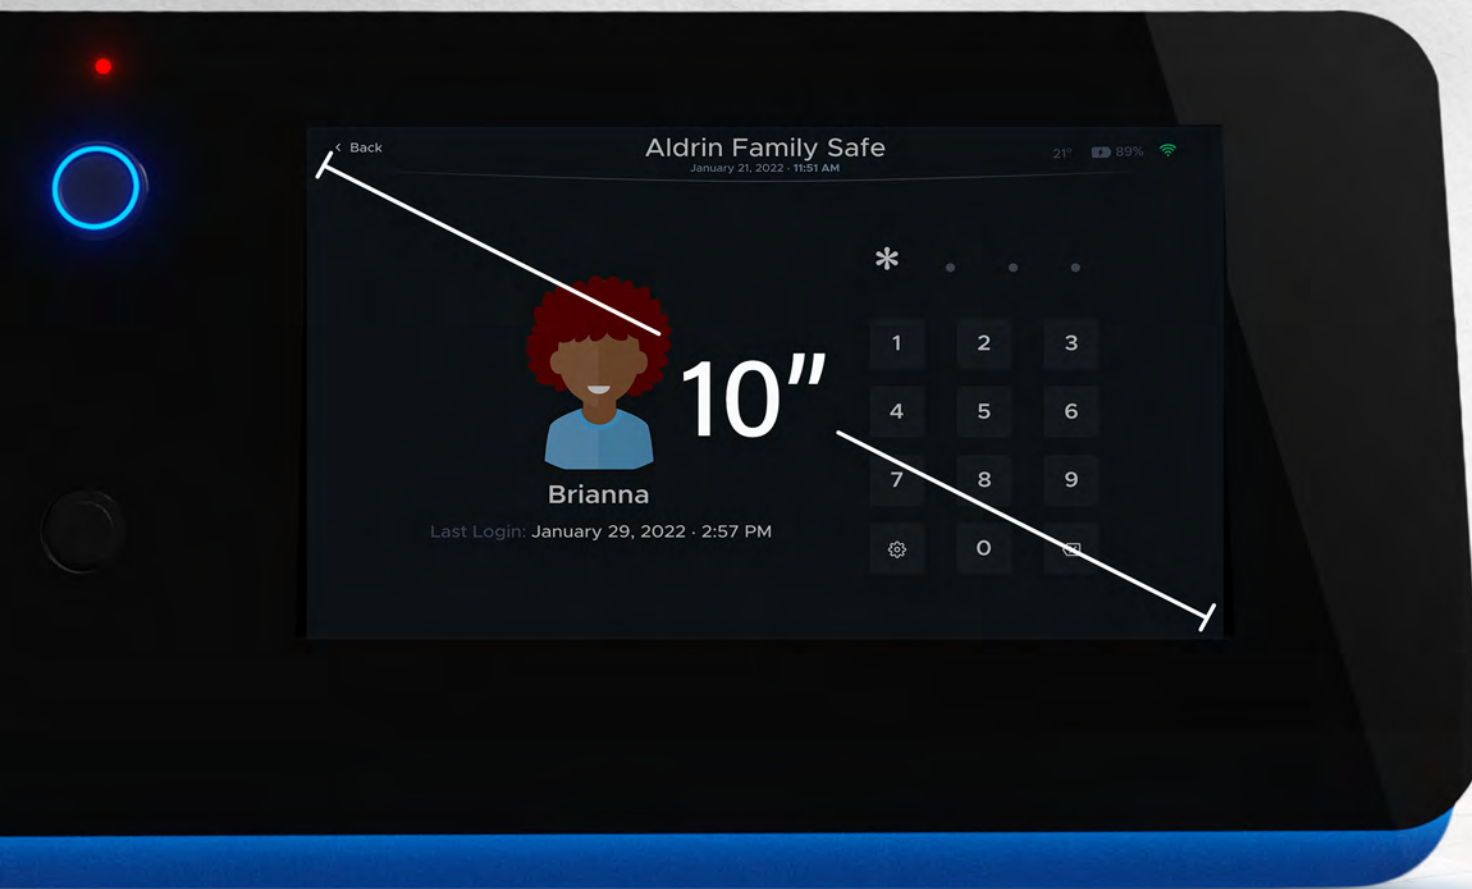

# Perfect for everyone

In any location or situation

-  Individuals
-  Families
-  Cohousing
-  Offices
-  Airbnb
-  College dorms
-  Hospitality
-  Cash businesses

## Massive Display

The only safe with a touch screen

Equipped with a 3mm tempered glass and steel door, the stunning 10" HD touch display allows for easy access and is incredibly intuitive.

# Why is our lock so good?

## We teamed up with an exceptional lock manufacturer

The inside has 12 springless solid sliders, 6 key curves, 2 control bars, and more allowing the key to be scanned 4 times. That's 3x more scans than a conventional pin system, offering you maximum security. It's in the 2<sup>nd</sup> highest tier of all high security locks.

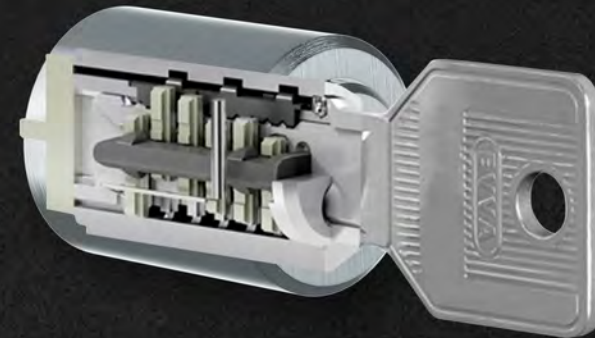

(3 Keys included with the safe)

## Super secure and reversible

The key has 4 curves that provide up to 133 billion possible key combinations with its overlapping key's curve cuts, and side coding.

1 in 133,000,000,000 billion

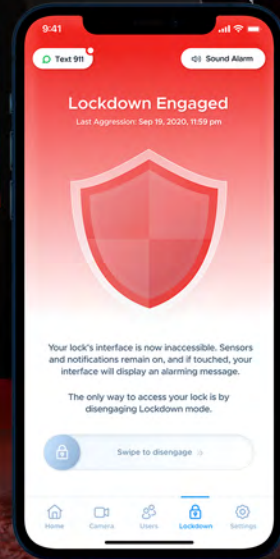

# Lockdown

## Detect tampering and vibrations

Our accelerometer sensors detect movement and tampering. If anyone attempts to access your safe, you will receive a notification and your safe will go into lockdown mode.

The LCD display will be inaccessible, the alarm will sound, and you can notify 911 from the app.<sup>1</sup>

<sup>1</sup> Alerting 911 from The Space App sends a text to 911. 911 via SMS is still being tested nationally. User reserves all responsibility for this service.

## Safe even in danger

Activate your Panic Pin; 1234 → 4321

In the event you are forced to open your safe, enter your PIN code backwards to open the safe, and an SMS will notify your emergency contact of your situation and request them to advise the police on your behalf.

 WhatsApp

### Aldrin Family Safe

Hi James, you were set as the emergency contact for Buzz's safe. Please help. The silent alarm has been triggered because there is a burglar in the house with the Buzz NOW. Please call the police NOW and send them to 5 Dill Pickel Road.

\*\* Make sure to notify your emergency contact person when setting up. That SMS will contain the owner's address.

TheSpaceSafe.com

# Recover a forgotten PIN!

We've all forgotten at least one PIN

Don't worry, you're not losing your mind. Over 50% of people forget their PINs. Sleep soundly knowing that we are the **ONLY** safe that gives you the ability to recover your PIN and gain access to your device.

Just set up a few security questions unique to you, and if you ever forget your PIN, instantly recover it.

\*\* Can be used once every 24 hours. All users get notified if attempted.

Who's your "hall pass" celebrity crush?

What was your favorite subject in high school?

What is the name of the road you grew up on?

What was your first car?

Where was your favorite vacation as a child?

If you were stranded

What is your special talent?

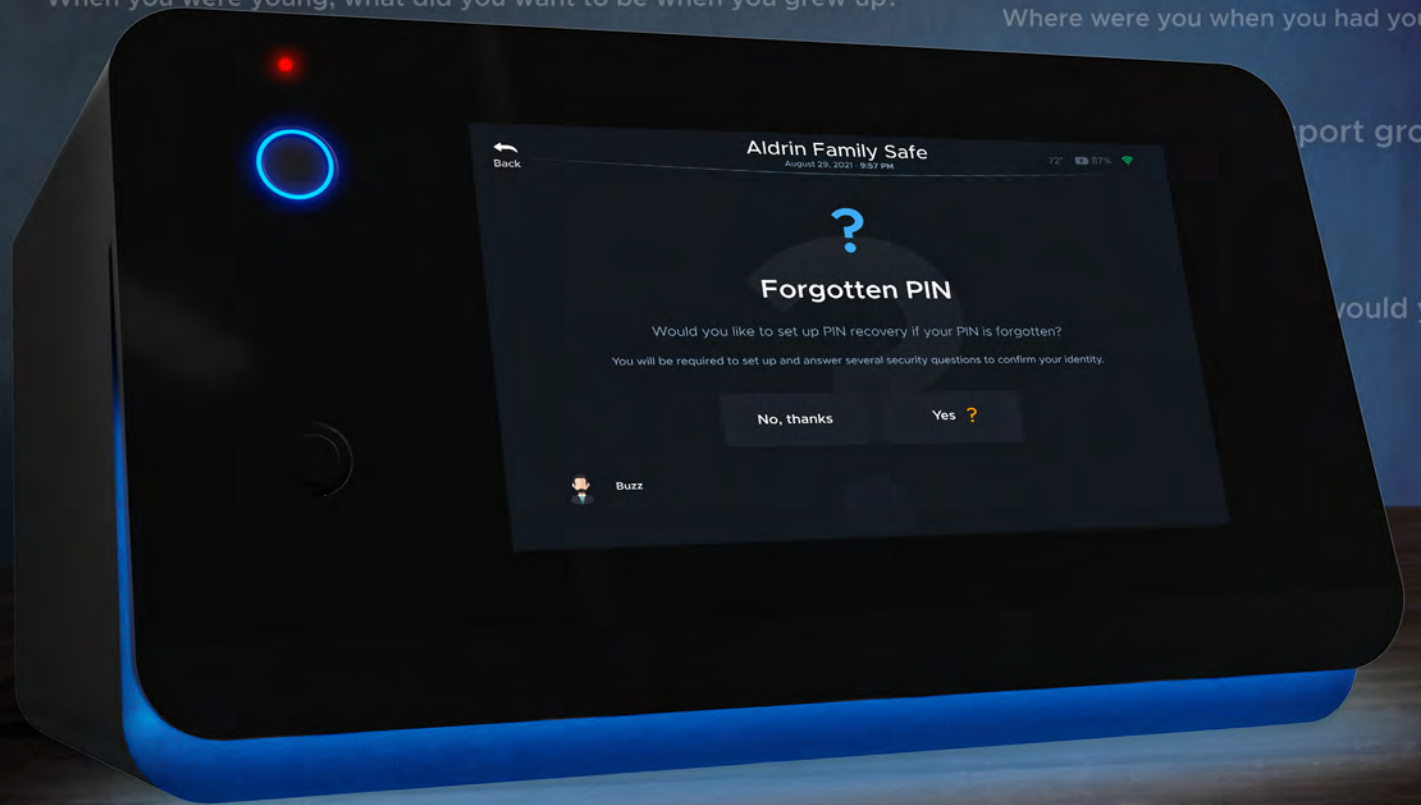

What was the name of your first stuffed animal?

When you were young, what did you want to be when you grew up?

Where were you when you had your first

port growin

would you p

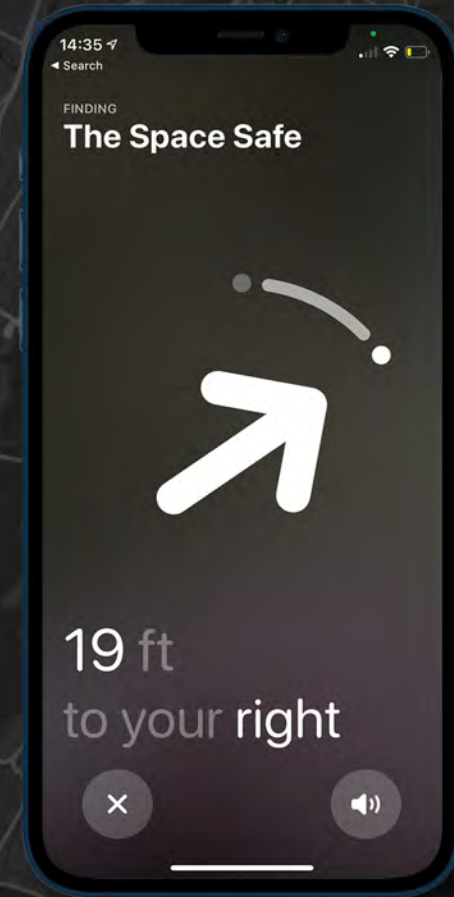

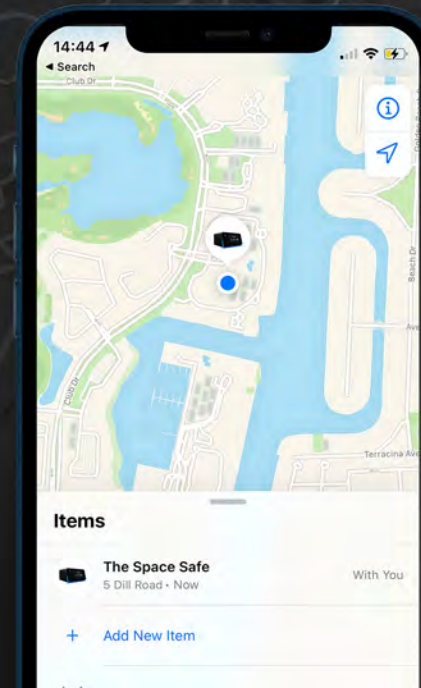

# Find my safe

## With location based geofencing

We suggest buying an Apple Airtag and sticking it to your safe. Use the Apple network consisting of hundreds of millions of iPhones around the world to find your safe precisely to the nearest inch.<sup>1</sup>

<sup>1</sup> Using Apple's 'find my' app allows you to locate your safe, and by using a separate app, adding another layer of protection.

TheSpaceSafe.com

## Multiple Users

You decide who accesses your safe when, and how

Add up to 4 Users per safe \*

\* Unlimited users with a subscription

Grant temporary User Access with a 1 time PIN

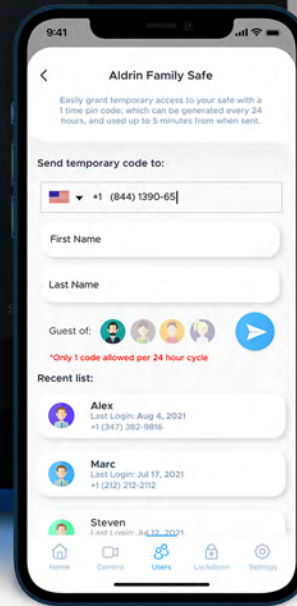

2 Factor Authentication \*

\* Setup 1 factor or 2 factor authentication

Disable Users anytime you like

# Instant Access

## Biometric fingerprint sensor

With our FBI approved advanced round biometric fingerprint sensor, instantly unlock your safe at any angle for quick access. The 508 DPI, 192 x 192 pixel capacitive sensor scans the smallest parts of your finger to guarantee your fingerprint isn't mismatched.

5 fingerprints allowed per user

# Faux Screens

## Display screensavers when locked

Secure lock screen disguise your safe from showing the login screen. Remove the disguise only by clicking on your preset designated unlock location.

Choose from Faux Printer, Faux Radio, The Weather, or select your favorite family photo.

# Airbnb mode

Convenience is key...

Automate the entire process for you and your guests. A special safe mode created to allow guests to self check-in; eliminating physical contact with them, giving guests ultra flexibility when staying at a property.

Allow guests to set or adjust their own checkout dates with the intuitive interface.<sup>1</sup>

<sup>1</sup> Owners have 24 hours to accept or deny guests and checkout dates before they are automatically approved.

# Temperature and Humidity

## Protect what's inside

Built-in sensors detect temperature and humidity levels, keeping your valuables in the most optimal condition.

In the event a fire breaks out, instantly get notified, view the camera feed, and alert 911.

now

### Aldrin Family Safe

The interior temperature of your device has passed your 90° limit.

# Rechargeable Battery

Always on, always connected

Plug in the discreet USB-C power adapter to any active outlet. In the event your power goes out, the internal backup battery will instantly power your device.

*\*Annual energy consumption is \$3*

*\*\*Comes with a key for manual access in the event of an emergency*

## Interior USB

### Store and recharge

With interior USB-A and USB-C ports, easily store your devices and have them charged up for when you take them out.

*\*USB port is for charging only and not capable of transferring data.*

# Software Update

Stay up to date

With our regular over-the-air (OTA) software updates, your Space Safe can always receive the newest features, and the most current technological upgrades.

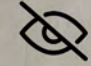

## Exterior LED Lights

### Completely customizable

Personalize and adjust your safe's exterior lights and brightness to match your persona and settings. If you prefer no lights while the screen is on, easily turn them 'always off' or keep them 'always on'!

# Incognito

Unnoticed, but appreciated

The best place to hide things are in plain sight - making them the most difficult to see.
